INTERNSHIP PROGRAM POWERED BY TRIDENT DIGITECH SERVICES

Designation: App Developer

Job brief

We are looking for a qualified **App Developer/Software Developer** to design and code functional programs and applications. You will work as part of a team and individually with little supervision.

An App Developer must have excellent knowledge of at least one object oriented programming language. They must be familiar with a variety of operating systems and platforms. The ideal candidate will also have an analytical mindset and a keen eye for detail.

The goal is to write “clean” and flawless code to produce fully functional software applications according to requirements.

Responsibilities

- Understand client requirements and how they translate in application features
- Collaborate with a team of IT professionals to set specifications for new applications
- Write high quality source code to program complete applications within deadlines
- Perform unit and integration testing before launch
- Conduct functional and non-functional testing
- Troubleshoot and debug applications
- Evaluate existing applications to reprogram, update and add new features
- Develop technical documents and handbooks to accurately represent application design and code

Requirements

- Experience in designing and building applications
- In-depth knowledge of programming for diverse operating systems and platforms using development tools
- Excellent understanding of software design and programming principles.
